

MORTOFF INDOOR TRACKING SYSTEM

What is MITRAS?

MITRAS – Mortoff Indoor Tracking System is a new solution that allows you to track, visualize and analyze the movements of indoor moving units (people, robots, transport vehicles) in factories and plants.

Our Position Analytical Solution was created to discover the bottlenecks within the plant, analyze the utilization of moving units, waiting times, and delays.

Benefits of using MITRAS

You will have a real-time visual overview about movements in the factory

You can manage multiple warehouses in a single application

You can track both operators and vehicles

You will receive alerts about unwanted movements

Statistics calculated from historical data, enables you to optimize manufacturing, and minimize wasted time, that leads to cost savings

When should you implement MITRAS?

- If you want to track movements of moving vehicles and people in the factory
- If you want to optimize production-related delivery processes in the plant
- If you want to reduce wasted time due to unnecessary movements and waiting

About Us

Mortoff has been working with medium-sized and large enterprises since 2002. Our activity covers various fields from consulting through development and testing, to complete project management. During the last fifteen years, our company has always focused on providing IT services and innovative products to its customers. Thanks to this effort, we have appeared on the market with unique solutions that help the digital transformation of enterprises.

Competencies

Our experts have proven their professional competence in many fields. Thanks to this, we can provide competent employees or teams to our customers, which is a guarantee of success, and can also be the basis for a long-term cooperation. Our competencies - primarily in terms of technology classification - can be divided into four major categories:

DEVELOPMENT

- Backend
- Frontend
- Embedded

TESTING

- Testing Resources
- Test Automation
- Test Management

CONSULTING

- Project Management
- General Consulting

BUSINESS INTELLIGENCE

- Big Data
- Visualisation
- Data Warehouse
